EXHIBIT A: STATEMENT OF WORK PREDICTIVE POLICING DEPLOYMENT

Predictive Policing Software-as-a-Service ("SaaS") Subscription Agreement Between PredPol, Inc. and the City of Fresno ("Client")

A. OVERVIEW

PredPol, the predictive policing company, provides command staff, crime analysts, and patrol officers with proven, accurate, easy to use predictions for where and when crime is most likely to occur. This includes property crimes, personal crimes, gun violence, gang activity, and traffic incidents. Used as an everyday policing tool and for special operations, predictions are generated for each shift and delivered on paper or to any internet-connected device. The predictions are shown on maps as 500 foot by 500 foot boxes, about the size of a large intersection that officers patrol during their shift when not responding to calls for service or performing other duties.

B. Three types of crime data – type of crime, place of crime, and time of crime – are delivered through a secure Data Pipe from Client's Records Management System (RMS) to the PredPol Service. Predictions are then generated and made available anytime a user logs in to the system.

C. TERMS

1. Financial Parameters:

- a. This Agreement has a one-year term, with options for two one-year extensions. The total fee of \$80,000 is due at contract execution. Should City exercise its option for the two additional years, the rate will be \$86,000 per year, due on the anniversary of the "Service Commencement Date." PredPol will provide the GPS Dosage Meter and CrimeWhere public crime mapping at no cost.
- b. There are no additional fees for training, no individual license fees, no need for new hardware or new hiring, and no limit on the number of Client users or prediction views.
- c. Maintenance and upgrades of the Service will be provided at no additional cost during the Initial Services Term.

2. Non-Financial Parameters: Client agrees to make reasonable efforts to support PredPol by doing the following during the term of this Agreement:

- a. Provide IT staff and services as needed during the initial setup of the Data Pipe;

- b. Deploy and utilize the PredPol tool according to PredPol's recommended best practices;
 - c. Generally support the deployment of any new features/tools, including providing user feedback, as requested by PredPol;
 - d. Provide access to relevant databases and shared databases to which Client has access, pursuant to all applicable laws and access agreements.
3. Initial Services Term & Renewal: This Agreement is for an Initial Services Term of one year with payment due according to the terms set forth herein. Renewal following the Initial Services Term will be determined by both Parties in writing sixty (60) days prior to the end of the Initial Services Term.
4. Effective Date: This Agreement is effective when signed by both Parties and will terminate on the end of the Services Term.

D. SCOPE OF WORK

Scope of Work: PredPol shall provide services, resources, and tools to support a successful implementation of the PredPol Services to support Client's efforts to suppress, deter, and reduce crime. The scope of work will include developing and providing the following:

- Setup and integration of a secure Data Pipe from Client's three Record Management System's to PredPol Service. Data to be transferred is restricted to fields related to type of crime, place of crime, and time of crime.
- Electronic transfer of 500' x 500' predictive locations (latitude and longitude data) identified by PredPol to Client for electronic consumption via three secure websites.
- Access to historical crime mapping for crime types as defined and agreed with the Client.
- A "train the trainers" session in operations and best practices. Training takes one hour via remote web session. PredPol also provides client support and training materials online through the Support Portal.
- Access to the Radar tool that details hit scoring.
- Full access to the Services for unlimited Client users, prediction views, and report generation.
- Provide online, and email support to Client for technical and operational use.

E. DEPLOYMENT STEPS AND PROPOSED TIME SCHEDULE

Implementation of predictive policing for Client will include the following steps and proposed schedule:

- **Setup of the PredPol Services using Client's existing RMS database.**
Timeline for setup is dependent upon availability of the Client's technician for installation of the Predpol data pipe. Once an agency provides initial data transfer and ensures the correct data mapping is in place, the PredPol system can be ready to generate predictions within two weeks.
- **Technical Implementation Steps.**
Technical Implementation depends on Client IT resource availability. The steps are as follows:
 1. PredPol to conduct a kickoff meeting or conference call with appropriate Client staff (as identified by the Client) upon receiving signed Agreement.
 2. Client to complete an informational form provided by PredPol.
 3. Upon receiving the informational form provided by PredPol, PredPol will send installation instructions to Client.
 4. Per instructions, the Client must complete the installation of Data Pipe and complete the online setup form. PredPol staff will be available for support as needed.
 5. Upon successful installation of Data Pipe and completion of setup form, PredPol will complete initial data processing.
 6. The PredPol Service will generally be available to Client within two weeks from the completion of this step. Successful completion of this step is contingent on the Client confirming that the data mapping is correct.

The overall timeline for implementation depends on Client resource availability.

- **Electronic transfer of 500 square foot predictive locations (latitude and longitude data) identified by PredPol to Client.**
Upon completion of technical implementation, Client will receive three URL's and login information of their PredPol sites via email for their review. Upon Client signoff, PredPol will work with Client to schedule training.
- **Training.**
PredPol recommends a "train the trainers" approach for command staff, supervisors, and analysts once the system goes live. This provides a better understanding of the system and allows new officers to be trained as needed.

Training takes one hour, including questions and answers. The training is available via remote web session. PredPol also provides online training materials and email support.
